**Subject:** "TESTIMONY FOR FEB 12, 2018 ENERGY COMMITTEE MEETING"

Committee Clerk,

On June 13, 2017, DTE Energy turned our electricity off for four day's, stating that our analog meter was UNSAFE to use-eventhough that meter was installed thirty-four plus year's earlier-and forced my wife and I to cut the lock off of our analog meter in order to restore our power. DTE Energy installed a Opt Out Meter-which releases electromagnetic radiation-late in the afternoon on the fourth day. Ever since that day, our health has taken a turn for the worse.I

We never received an electric bill for the month's of August and September 2017. When we received our December 4, 2017 billing statement there was a charge for \$438.59. We were shocked to see a bill with a charge such as that. For our thirty-four plus year's that we have lived in this house, we have NEVER received a bill near this amount for one month's electrical usage.

I contacted DTE's billing department and asked them why we never received a bill for the month's of August and September 2017, and why we received our December bill for \$438.59. The customer service rep said, "we are checking into it." I told her that we had not used anymore electricity for those month's than any other previous month's. She replied,"we are conducting an investigation into it." We contribute those extremely high charges to the Op Out Meter that DTE installed on our home on, June 13, 2017. We are still liable for those charges, and we will attempt to set up a fair payment plan with DTE to pay off that amount due.

Respectfully yours,

John Rokas
